

# Digital alarm contact - for testo 150 TUC data logger

This component is part of the testo Saveris 1 environmental monitoring system. The modular system records and analyzes your critical environmental data, alerts you immediately if limit values are violated and can help you optimize your processes.

## Technical data

### Temperature - NTC

Operating temperature	-30 to +50 °C
Storage temperature	-30 to +60 °C

### General technical data

Alarm contact	2x ferrules, white
Cable diameter	2.0 x 4.0 mm
Cable length	1.3 m
Weight	27 g
Connection	TUC

### Delivery Scope:

1x alarm contact

---

Integration of external alarm signals

---

For connection to testo 150 TUC4 data logger

---

Easy installation, maintenance and commissioning

---

The digital alarm contact can be used with the testo 150 TUC4 data logger module. It enables external signals to be integrated into the Saveris monitoring system. A floating contact on the equipment to be monitored is used for this. A Saveris alarm message can thus be generated in response to an alarm signal from the equipment.

Application example: Integration of freezer alarms for...

- Voltage error
- Capacitor temperature
- Battery voltage
- Ambient temperature
- etc.
