

# Junction box for external probes

This component is part of the testo Saveris 1 environmental monitoring system. The modular system records and analyzes your critical environmental data, alerts you immediately if limit values are violated and can help you optimize your processes.

## Technical data

### Temperature - NTC

Measuring range	0...10 V / 4...20 mA
-----------------	----------------------

### General technical data

Housing Material	Plastic
Dimensions	125 x 200 x 45 mm
Weight	8793 0041: 381g, 8793 0042: 454g
Protection Class	IP 20

### Delivery Scope:

1x junction box, 1x mains plug for power supply, 1x micro USB cable to testo 150 TUC4, 1x connection cable to testo 150 TUC4.

Integration of an external probe via 0...10 V or 4...20 mA inputs

For connection to testo 150 TUC4 data logger

Integrated power supply for external probe and data logger

Easy installation and commissioning

The junction box allows an external probe to be integrated into the Saveris 1 system via the testo 150 TUC4 data logger module.

The junction box allows an external probe to be integrated into the Saveris 1 system via the testo 150 TUC4 data logger module.

The probes can be equipped with a suitably configured connection cable or provided by the customer.
