

# Pitot tube, 19.7 in. - stainless steel

This 19.7" stainless steel pitot tube can be used to measure flow velocity.

## Technical data

### General technical data

Weight	4.45 oz. / 126 g
Measuring range	+197 to +19685 fpm / +1 to +100 m/s
Operating temperature	32.0° to 1112.0 °F / 0 to +600 °C
Housing	Metal housing
Product colour	silver

### Delivery Scope

1 x stainless steel Pitot tube, length 500 mm, Ø 7 mm.

---

For measuring flow velocity

---

Ideal for high flow velocities and heavily contaminated flow

---

Match this pitot tube with a connection hose and pressure probe to allow for flow velocity measurement.
