

# Pitot tube, 3.3 ft - stainless steel

This 3.3' stainless steel pitot tube can be used to measure flow velocity.

## Technical data

### General technical data

Weight	8.29 oz.} / 235 g
Operating temperature	32.0° to 1112.0 °F / 0 to +600 °C
Length probe shaft	39.37 in. / 1,000 mm
Housing	Metal housing
Diameter probe shaft	0.276 in. / 7 mm
Product colour	silver

### Delivery Scope:

1 x stainless steel Pitot tube, Ø 7 mm, length 1000 mm.

For measuring flow velocity

Ideal for high flow velocities and heavily contaminated flow

Match this pitot tube with a connection hose and pressure probe to allow for flow velocity measurement.
